

Recherche personnalisée

Procédure

1. Open a new tab and type in the address bar: `about:config`
2. In the search box type: `browser.urlbar.update2.engineAliasRefresh`
3. Click on the little + symbol on the right
4. Go to Firefox Settings → Search. Or enter this in the address bar: `about:preferences#search`
5. In the "Search Shortcuts" section you should notice a new "Add" button. search add button
6. Press the "Add" button and fill in the name, search engine url and a keyword (optional). The engine url should contain a %s in the url; Firefox replaces the %s with your search terms. An example of this is: `https://www.google.com/search?q=%s`
7. Go to the "Default Search Engine" section and select the engine you just added.
